

Project no. GOCE-CT-2003-505539

Project acronym: ENSEMBLES

Project title: ENSEMBLE-based Predictions of Climate Changes and their Impacts

Instrument: Integrated Project

Thematic Priority: Global Change and Ecosystems

D7.6 A set of economic impact interfaces for climate change impact models

Due date of deliverable: February 2006

Actual submission date: March 2006

Start date of project: 1 September 2004

Duration: 60 Months

Organisation name of lead contractor for this deliverable: Uni-HH

Revision [draft, 1, 2, ...]

Project co-funded by the European Commission within the Sixth Framework Programme (2002-2006)		
Dissemination Level		
PU	Public	✓
PP	Restricted to other programme participants (including the Commission Services)	
RE	Restricted to a group specified by the consortium (including the Commission Services)	
CO	Confidential, only for members of the Consortium (including the Commission Services)	

At the start of ENSEMBLES, we were able to estimate the static economic feedbacks of climate change impacts on tourism, health, and sea level rise. Two of the three papers on this have now been accepted for publication, the third is under re-review. Since then, we have added extreme weather events, agriculture and land use, and water use. For agriculture and land use, the first paper is almost ready for submission. For water use, the model is ready and documented, but run-off scenarios are still missing. See Deliverable 7.4
